

Calculation

- users : User[]
- spreadsheets : Spreadsheet[]
- + Create Spreadsheet () : Spreadsheet
- + Delete Spreadsheet (spreadsheet : Spreadsheet) : void
- + assignUserToSpreadsheet (user : User, spreadsheet : Spreadsheet) : void
- + Save () : void
- + Save As (fileName : String) : void
- + load (fileName : String) : void
- + importFile (fileName : String) : void

Cut Buffer

- bufferCells : Cell[]
- + copy (cells : CellRange) : void
- + cut (cells : CellRange) : void
- + paste (cells : CellRange) : void

Functions Content

- cellRange : CellRange
- referenceContent
- referenceCell : Cell
- + evaluate () : String

Cell

- content : CellContent
- address : String

Binary Function

- + ADD (cells : CellRange) : int
- + SUB (cells : CellRange) : int
- + MUL (cells : CellRange) : int
- + DIV (cells : CellRange) : int

Literal Content

- + evaluate () : String

Spreadsheet

- spreadsheet : Cell[][]
- assignedUsers : User[]
- cutBuffer : CutBuffer
- + addUser (user : User) : void
- + removeUser (user : User) : void
- + copy ()
- + paste ()
- + cut ()
- + insertContents (address : String, content : String) : void

CellRange

- startCell : Cell
- endCell : Cell

<<abstract>>

Cell Content

- <<abstract>> + evaluate () : String

Range Cell Function

- + AVERAGE (cells : CellRange) : int
- + PRODUCT (cells : CellRange) : int
- + CONCAT (cell : CellRange) : String
- + COLLEGE (cell : CellRange) : String

User

- username : String
- spreadsheet : Spreadsheet[]
- + addSpreadsheet (spreadsheet : Spreadsheet) : void
- removeSpreadsheet (spreadsheet : Spreadsheet) : void

Str literal
-strans : String
Int literal
-integer : int
